1. Overview

1.1 Features
Compact, pocket-sized design
GPS microphone
Plug & play

1.2 Specifications
- GPS frequency: 1575.42 MHz
- Accuracy: 5m
- Working voltage: 16VDC
- Current consumption: <10mA
- Operating temperature: -20°C to 70°C
- Non-slippery

1.3 Accessories
- 1 user guide
- 1 SIM card
- 1 plastic case

NOTE: Please check the complement of accessories in the package box. The accessories present in kind. Due to the continuous upgrade and optimization of products, any changes without notice.

2. Overview

2.1 Appearance

3. SIM card installation

3.1 Open the lid
Please insert the top edge of the box to the box on either side of the open lid hole as shown in the illustration. When the lid is open, press and gently pry open the handle to open the lid. After the lid is removed, install the SIM card following the installation method (please see 3. SIM card installation).

3.2 Close the lid
When closing the lid, be sure that the positioner is aligned in the same direction as the semi-circular top hole of the upper lid. Close the lid tightly in the correct direction to prevent damage to the equipment.

3.3 SIM card installation

NOTE: When the SIM card is inserted, device will use the backup battery to power on. If the charge of the internal battery is low, be sure to connect the device to the OBD interface of the car to take electricity.

2.2 LED indications

3.4 Boot up/power off

1. Boot up
After inserting the SIM card, the device will power on by using the backup battery. When the device is inserted into the OBD interface, the internal battery will be charged.

2. Power off
After unplug device from the OBD interface, remove the lid and take off the SIM card, the device will shut down.

4 Functions

The following features can be configured through the terminal platform or APP provided by the dealer.
a) SOS number
(1) Add SOS number via SMS command
Send SMS command: "SOS, A, number1, number2, number3" (A means add number)
You could set 3 SOS numbers in maximum, if set successfully, the terminal will reply "ok",
E.g.: SOS, A, 153101,153116,136126,98 (set all 3 SOS numbers),
SOS, A, 136101,96 (set the first SOS number),
SOS, A, 153116,136126,98 (set the third SOS number).

(2) Delete SOS Numbers
Send SMS command: "SOS, D, A, 2,3,4,5,6 (D means delete SOS number)"
E.g.: SOS, D, A, 153101,153116,136126,98 (delete all SOS number)
You could delete all SOS numbers, if set successfull, the terminal will reply "ok".
E.g.: SOS, D, 153101,153116,136126,98 (delete all SOS numbers)

b) Geo-fence alert
After setting the alarm zone on the platform and selecting the trigger conditions of the alarm, the device will send corresponding alarm out to the platform according to the trigger conditions when the device enters and exits the geo-fence.

5 Platform operation

To ensure quickly and correctly use, please read this manual carefully before using. Any changes to the product appearance, color or accessories are without notice.
